# Who are we?

*We're just like you...*

We get it. We are a strong and talented team of cannabis proponents and tech professionals with years of combined experience in cryptocurrency and the cannabis industry under our belts. We all wanted something better and we saw a future in cryptocurrency.

Let's face it, handling all that cash is an extremely risky effort plus banks are a hassle for cannabis businesses. The world is changing. The idea behind our project is that, simply put, Bitcoin is becoming too valuable to spend on everyday purchases like cannabis and that cryptocurrency, in one form or another, will eventually be ubiquitous.

Cannacoin is smarter, more efficient, and safer than traditional money.

# Our Story

Cannacoin was first deployed on March 28, 2014 as a solution to the "cash only" respite set on growers, dispensaries, and consumers alike through federal regulation and as a response to the Global Financial Crisis (GFC) of 2008. It is the evolution of distributed computing and the BitTorrent protocol.

It was the brainchild of the founders of the popular, but now defunct, NWGT.org medical cannabis forum and exchange that initially formed from a simple CL encounter to well over 20,000 members at its peak. Cannacoin is a new form of electronic money called "cryptocurrency" more specifically an "altcoin" similar to Litecoin and Dogecoin and is geared toward use within the independent, medical, and recreational cannabis community worldwide as a medium of exchange, a unit of account, and a store of value for cannabis and cannabis related goods and services.

# We want to be your coin of choice for cannabis transactions.

We want to bring Cannacoin to the masses in order to make the world a safer and friendlier place. We think we know how to do it. We want to install Cannacoin kiosks in participating cannabis shops that accept cash, credit, and debit to print purchase tickets with QR codes that can be used in the store with our retail POS system, "Cannacoin Pay". Any remaining balance on these tickets can then be re-absorbed by scanning the QR code with our mobile "Cannacoin Pay" app on the customer's mobile device for later use or staking.

Cannacoin is a safe and secure process. It is a seamless experience.  
What are you waiting for?

# cannacoin.org

## How does it work?

We utilize Proof of Stake and decentralized blockchain technology to verify and record transactions in real time and ensure the security of the value therein. The amount of Cannacoin you hold determines your network weight which in turn determines your mining power which is used to verify transactions and release freshly minted coins to the network. You then earn new coins based on the amount of coins you already hold. It's as easy as that.

Available for Windows and Linux. Soon available on Android.

Retail POS solution called Cannacoin Pay

Online exchange and kiosks at participating shops

## Why use Cannacoin?

We believe that Bitcoin is quickly becoming too precious to spend on everyday purchases such as cannabis. Other people are noticing this too, as with the sudden surge in the altcoin market. This is why we need coins like Cannacoin in order to stay relevant and facilitate your cannabis purchases moving forward. Also, Cannacoin is Proof of Stake which means you are entitled to a percentage of interest based on the amount of Cannacoin that you hold so you earn more Cannacoin the more Cannacoin that you have. Cannacoin also has an API that means you can incorporate the Cannacoin protocol into your own applications.

# The Team

*It takes a village...*

OCTOBER 2021

# PHASE I

# ROADMAP

## PHASE II

- Recruit Volunteers
- Conduct Fund Raising
- Write a Whitepaper
- Hire a development team
- Audit and verify the source code on GitHub
- Upgrade and release an updated wallet for Windows, Linux, and Android
- Launch a block explorer on <https://cannascan.info>

- Secure a legal team
- Obtain a payment processor
- Hire online risk management team
- Recruit a customer support team
- Employ a sales and marketing team
- Launch a standard order book type exchange at <https://cannacoin.exchange>

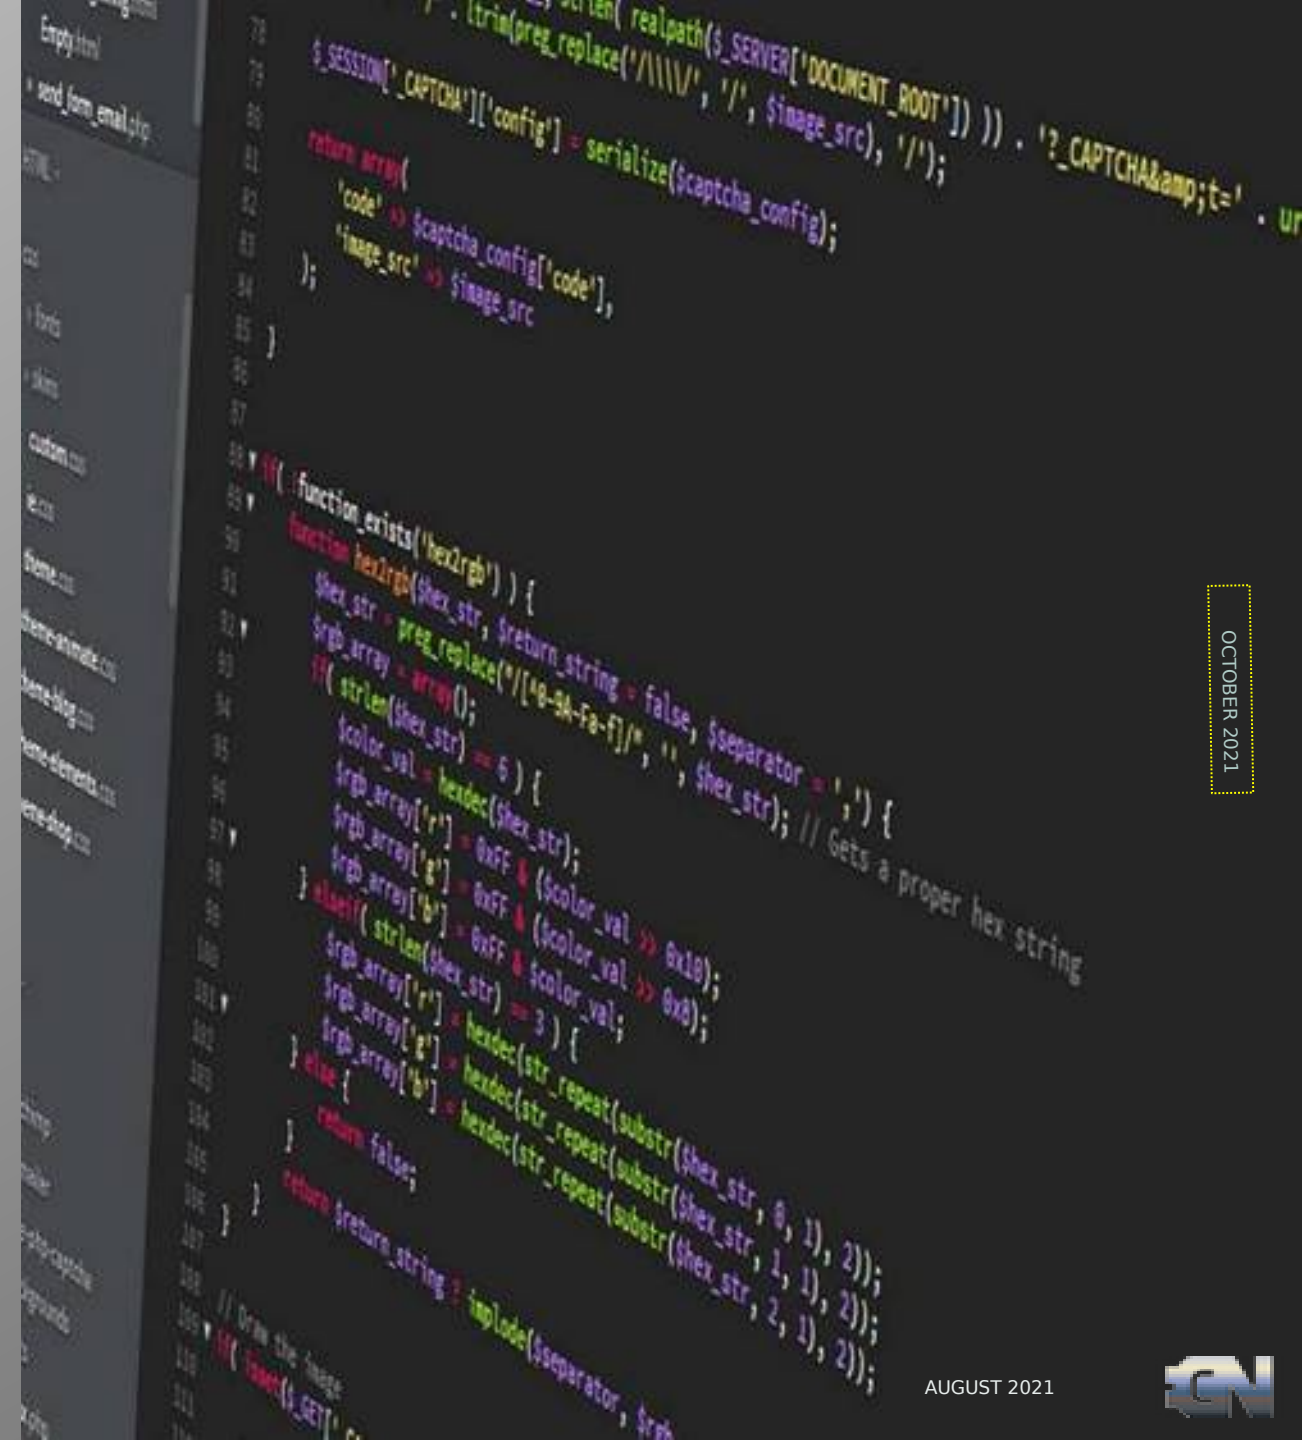

# SOURCE CODE

*Garbage In, Garbage Out...*

The Cannacoin source code is a brilliant work of art made with love by hand for all to enjoy. It is now, and always has been, completely free and open source available for public audit and contribution on GitHub. We have proudly been "Proof of Stake" since December of 2014 for environmental awareness and scalability. Feel free to jump in and browse our codebase and join the more than 200 independent contributors to date.
